Barron -

Thanks for checking back on this. We are still a distance away from determining needs and pricing. Assuming that we are successful on the 14th at Special Town Meeting to buy the property, then we will be proceeding into design which will hopefully be complete by early spring. In this plan, we will be going to Town Meeting in May for project approval, so construction can start next summer with occupancy sometime in 2019. So, we haven't even begun contemplating fiber and data options at all and I don't want to slow your process. It seems like the best course of action is for you to proceed now and for us to double back at some point next year once I actually have a better sense of our design needs and potential costs - a future partnership may be possible or we may end up leasing on our own too.

Jason
